

Mobile Power Distribution Station

Model No. 0750

The Power You Want. The Portability You Need.

Available for Rent or Purchase

CleanAir's® Mobile Power Distribution Station is a rugged and safe temporary 120/240VAC single split phase system perfect for most field service applications. The power station is mounted on a sturdy aluminum two-wheeled cart for easy maneuvering, even on rough terrain. It converts a single-phase 480VAC input into multiple 120V and 240V receptacles to power your entire field operation. Each of the sixteen (16) 120VAC GFCI outlets are breaker protected for safe use in any location (indoors or outdoors). The two (2) 240VAC outlets are equipped with heavy duty receptacles, and all the circuit breakers are encased in a NEMA 3R weatherproof breaker box with window. When your field operations require power to several locations at one time, where standard electrical service is not readily available, no other solution compares to this Mobile Power Distribution System. *Call for custom options on voltage and power connections.

Specifications

- Weight: ~285 lbs
- UL Listed- E361114
- Made in the USA
- Material: Aluminum
- Color: Gray
- Temperature Limitations: 75°C
- Tires: No-Flat All Terrain foam filled tires
- Cord: 50' power cord (100' power cord - optional)
- Voltage Rating: 480/120-240
- Amperage Rating: 60 amps
- Transformer Type: 15 KVA, 30A Primary
- Line In: 480VAC Single Phase
- Line Out: 120VAC - 240VAC Single Phase
- 480VAC Mating Receptacle: VR642, AREA 6425 (optional)
- 240VAC Outlet: 2 - 240VAC 20A Protected heavy duty receptacles
- 120VAC Outlet: 8-120VAC GFCI receptacles (16 outlets)
